

Group profile
Freudenberg Group

FREUDENBERG GROUP

■ Freudenberg is a family-owned group of companies active on the global stage. Its 16 Business Groups operate on various markets and in various sectors of industry.

Freudenberg offers its customers in the passenger car and commercial vehicle industry, mechanical and plant engineering, textile and clothing, construction, mining and heavy industry, energy, chemical, oil and gas sectors tailor-made, innovative technological products and services. Customer groupings also include companies in the medical technology, civil aviation, rail vehicles and semiconductor sectors.

Freudenberg develops and manufactures seals, vibration control technology components, filters, nonwovens, surface treatment products, release agents and specialty lubricants, medical technology and mechatronic products.

Freudenberg develops software solutions and IT services primarily for small- and medium-sized enterprises. Final users enjoy the benefits of Freudenberg's state-of-the-art household products marketed under the vileda®, O-Cedar®, Wettex®, Gala® and SWASH® brands.

Creativity, quality, diversity and innovative strength are the company's cornerstones. Reliability and responsible conduct rank among the basic values of the company which was founded over 160 years ago. Freudenberg is committed to partnerships with customers, and believes in a long-term orientation, financial solidity and the excellence of over 37,000 associates in 57 countries around the globe.

Organization

Freudenberg sees itself as an enterprising corporation. Operative business is the responsibility of stand-alone companies whose management conducts business autonomously. The individual companies belong to one of several Business Groups.

The Freudenberg Group has two parent companies: Freudenberg & Co. Kommanditgesellschaft, which is responsible for strategy, and Freudenberg SE, which is responsible for business operations. The Business Groups and Divisions report to Freudenberg SE. The only exceptions are the Freudenberg Service Support and Freudenberg Insurance Divisions, which report to Freudenberg & Co. Kommanditgesellschaft.

The corporate bodies of Freudenberg & Co. Kommanditgesellschaft are the Management Board, the Board of Partners and the Partners' Meeting. The corporate bodies of Freudenberg SE are the Board of Management, the Supervisory Board and the General Meeting. The Management Board of Freudenberg & Co. Kommanditgesellschaft and the Board of Management of Freudenberg SE have the same members. This also applies to the Board of Partners of Freudenberg & Co. Kommanditgesellschaft and the Supervisory Board of Freudenberg SE.

Family company

Freudenberg is a family company. It is owned by some 320 heirs to the founding father Carl Johann Freudenberg.

■ The Technology Specialist Freudenberg Sealing Technologies is a supplier, development and service partner for worldwide customers in the automotive industry, civil aviation, mechanical engineering, shipbuilding, food and pharmaceuticals, agricultural and construction machinery, and many other sectors. Based on the Simmerring®, which was developed by Freudenberg in 1929, Freudenberg Sealing Technologies has built up a broad range of seals. Success is based on the in-depth knowledge of processes, innovative development methods and advanced materials – regardless of whether the product is a customized solution or a complete sealing package to meet complex specifications. A global network of production and sales companies brings Freudenberg Sealing Technologies close to its customers in 32 different market segments. Together with its long-standing partner NOK Corporation, Freudenberg Sealing Technologies is expanding its customer-oriented competence further, above all in the growth markets of China, India and Brazil, as well as in North America.

NOK-FREUDENBERG GROUP CHINA

■ NOK-Freudenberg Group China is a 50:50 joint venture between NOK Corporation and Freudenberg serving the high-growth Chinese market with locally-produced and imported seal and vibration control technology products.

The joint venture supplies numerous European, US, Japanese and Chinese customers in the automotive and general industry sectors in China. In cooperation with the partners NOK Corporation and Freudenberg Sealing Technologies, the locally-manufactured product range is continuously expanded in line with market requirements. Market success is based on those factors which also account for the success of the Freudenberg/NOK Corporation network in other regions, namely technological leadership and quality.

Freudenberg Oil & Gas provides innovative seal solutions and differentiated seal products to the global oil and gas industry. The Business Group is focused on the exploration and production (upstream) segment. Freudenberg Oil & Gas serves a wide range of customers including oil and gas producing companies, original equipment manufacturers and the engineering and service companies that provide technologies, equipment and services for producing oil and gas from land-based and offshore platforms and deepwater subsea wells in regions throughout the world. Products range from simple elastomer O-rings and seals to large elastomer elements that work in controlling wellbore pressures during the drilling and completion process to highly engineered thermoplastic seals that perform at over 15,000 PSI and more than 350°F in well stimulation services. The Business Group uses its extensive technical expertise to manufacture products that play a key role in helping customers solve the challenges they face.

■ EagleBurgmann figures among the internationally leading companies for industrial sealing technology. The Business Group manufactures and markets a broad range of high-quality products – from individual designs right through to large-batch productions, irrespective of whether these are highly complex dynamic seal systems such as mechanical seals and supply units or special gaskets for a diversity of applications and sectors of industry. A workforce of some 6,000 employees in over 70 subsidiaries develops and produces EagleBurgmann seal solutions which customers around the world can rely on. A close-knit global sales and service network testifies to an international presence and customer proximity. The products are installed wherever safety and reliability are major design considerations when sealing demanding mediums under the most challenging technical conditions, for example in the oil and gas, refinery, chemical, pharmaceutical, energy, food processing, paper, water, shipbuilding, aerospace and mining industries.

FREUDENBERG NONWOVENS

Products and services

Interlinings, industrial nonwovens, spunlaid

Workforce

approx. 2,980

Production locations

Argentina, Brazil, China, France, Germany, India, Italy, South Africa, South Korea, Spain, Taiwan, UK, USA

Freudenberg Nonwovens develops, produces and markets nonwoven products for a wide range of applications. Nonwovens made by Freudenberg are used in interlinings for the garment industry and for technical applications such as battery separators, for acoustic purposes to provide sound absorption, as fireblockers in furniture and as cable insulation. In the medical and hygiene sector, nonwovens from Freudenberg offer the highest comfort and safety.

Freudenberg was the first company to introduce nonwovens on the market and continues to set the global standard with new ideas such as Lutraflor®, Lutradur ECO® and Vilene® Power Dot® Bonded. Freudenberg Nonwovens operates a global sales network and manufactures at 20 locations worldwide. The company has enjoyed very close cooperation with Japan Vilene Company Ltd., the Japanese market leader in nonwovens, for many decades.

FREUDENBERG POLITEX NONWOVENS

Freudenberg Politex Nonwovens, headquartered in Novedrate, Italy, is the world leader in the production and marketing of polyester nonwovens, mainly used as reinforcements for bituminous roofing membranes.

A broad range of products is furthermore sold to the construction industry for different applications. Padding materials for the furniture and apparel industries round off the product range.

The majority of products is manufactured with recycled polyester obtained inhouse from post-consumer PET bottles. This integrated production cycle not only recycles waste, but also significantly reduces CO₂ emissions.

Products and services

Roofing:
Staple and spun-bonded polyester nonwovens (standard or glass filament reinforced) used as backing for bituminous roofing membranes

Construction materials:
Products for water-proofing, thermal insulation, sound absorption, heat reflection, drainage, reinforcements and other applications

Padding:
Voluminous polyester nonwovens for the apparel and furniture industries
