

ITT Flygt Pumps Provided for Indian Power Plant

ITT Corporation India Private Limited — the Indian arm of US-based engineering firm ITT Corporation —has bagged its first major order to supply Flygt circulating water pumps for the growing power market in the country. The order worth US \$ 11.65 million (roughly Rs 52.48 crore) has been placed by India`s leading energy firm - Coastal Energen Private Limited.

The order will be executed by ITT Corporation`s production facility at Savli. The order comprises a complete electrical and mechanical package for the circulating water system and seawater intake systems at Coastal Energen`s thermal coal-fired power plant near Tuticorin in Tamil Nadu. Once installed, the Flygt large circulating water pumps will be among the largest sea water handling vertical column discharge pumps in India.

For ITT, the order is also one of the first major successes in the power sector in India this year and is also among the largest single orders to date.
