

Ned Leonard

Vice President for Program Support

American Coalition for Clean Coal Electricity

ACCCE is a partnership of the industries involved in producing electricity from coal

They say there is no such thing as
clean coal

What they dispute is the existence of
clean coal technologies

Carbon capture and storage secures a
future for coal-based electricity

CCS challenges policy makers

CCS challenges regulators

CCS challenges technology developers

CCS challenges electricity suppliers

CCS challenges consumers

“Rapid commercial development and deployment of clean coal technologies, particularly carbon capture and storage, will help position the U.S. as a leader in the global clean energy race.”

President Barack Obama
The White House
February 3, 2010

“There are no insurmountable technological, legal, institutional, regulatory or other barriers that prevent CCS from playing a role in reducing GHG emissions...”

Interagency Task Force on Carbon
Capture and Storage
Executive Summary - August 2010
