Sutron Receives USTDA Water Monitoring Contract for the Han River, China

December 16, 2010, Sterling, VA -- Sutron Corporation (NASDAQ:STRN), a global leader in hydrological, meteorological, and oceanic monitoring products, systems, software and services, announced today that the USTDA (U.S. Trade and Development Agency) awarded a \$585,745 grant to the Changjiang Water Resources Commission (CWRC) in China to fund a feasibility study and pilot project that evaluates the potential for employing technologies developed by Sutron to address China's water monitoring challenges in the Han River watershed.

In addition to the USTDA grant, CWRC and Sutron, the sole-source contractor, will contribute resources toward the study's completion. Development of this monitoring system would help ensure clean drinking water supplies to millions of people in Northern China. The agreement was signed during the twenty-first U.S.-China Joint Commission on Commerce and Trade.

The USTDA celebrates a decade of work in China by extending its program in the country for another ten years as well as awarding grants in support of opening the large China market to U.S. exports of goods and services as well as supporting China's efforts to reduce air and water pollution. For more information regarding these USTDA programs and grants, please refer to the Agency's press release by clicking on this [link](#).

The statements in this press release that relate to future plans, events or performance are "forward-looking statements" within the meaning of the Private Securities Litigation Act of 1995. Forward-looking statements include without limitation any statements regarding our expected future financial position, results of operations, cash flows, financing plans, business strategy, products and services, competitive positions, growth opportunities, plans and objectives of management for future operations, as well as statements that include words such as "anticipate," "if," "believe," "plan," "estimate," "expect," "intend," "may," "should" and other similar expressions are forward-looking statements. All forward-looking statements involve risks, uncertainties and contingencies which may cause actual results, performance, or achievements to differ materially from anticipated results, performance, or achievements. Factors that may cause actual results to differ materially from those in the forward-looking statements include those set forth in our filings with the SEC, including the disclosure under the heading "Business" and "Management's Discussion and Analysis" in the Company's Annual Report on Form 10-K filed on March 31, 2009. We are under no obligation to update or alter our forward-looking statements, whether as a result of new information, future events or otherwise.
